

Cove Point LNG Lusby, Maryland

B&W Energy Services was contracted to perform our professionally engineered Chemical Cleaning and Steam Blow services at the Cove Point LNG Export Project in Lusby, Maryland. B&W partnered with the project's EPC, Kiewit Power Constructors and joint venture partner IHI.

The project involves construction of liquefaction facilities for exporting LNG at the existing Cove Point LNG Terminal on the Chesapeake Bay. Together, the new and existing facilities will provide bi-directional import and export capabilities at Cove Point. Chemical Cleaning is the first awarded service for this project, with potential for many more cleaning awards to come. No matter how large or small your project might be, B&W Energy Services has many cleaning methods to complete your project on time and successfully.
