

Pio Pico Energy Center San Diego, California

B&W Energy Services was contracted to perform our professionally engineered Lube Oil Flushing services on three GE LMS100 combustion turbine generators at the Pio Pico Energy Center, a simple-cycle electrical generating facility located in Otay Mesa, just outside of San Diego.

B&W Partnered with Kiewit Power Constructors on the Pio Pico Project.

GE's LMS100 aero-derivative gas

turbine is a new generation technology

being installed across the country to improve the efficiency of energy

delivery. It provides a single, economical solution for the dispatch needs

of nearly every global power segment. Pio Pico is expected to become

operational by September 2016. B&W is proud to provide services on

such innovative technology. No matter how large or small your project

might be, B&W Energy Services has many cleaning methods to help complete your project on time and successfully.
