

REFICAR Project

Cartagena, Colombia

B&W Energy Services was chosen to provide Engineering and Pre-Commissioning Cleaning Services at the REFICAR expansion project in Colombia, South America.

B&W partnered with REFICAR, a subsidiary of Colombia state owned oil company Ecopetrol, to perform engineering and site-wide Steam Blow services for the major refinery expansion project. The project will increase processing capacity by 165,000 barrels per day and will relieve regional refining constraints, enabling REFICAR to produce clean, ultra-low sulfur gasoline and diesel from heavy crude. B&W Energy Services takes great pride in working with REFICAR to provide the Pre-Engineering and Steam Blow services that were required for this Major Refinery Expansion Project in Colombia, South America.
