

CELANESE

Bishop, Texas

B&W Energy Services is proud to contribute services to Celanese Corporation's project located at its chemical and specialty materials manufacturing facility in Bishop, Texas. Celanese Corporation is a global technology leader in the production of differentiated chemistry solutions, and has chosen to partner with B&W Energy Services with an array of services, including lube oil flushing on their GE Frame 6 Gas Turbine.

B&W Energy Services has supported Celanese Corporation through past projects, and is eager to strengthen the working relationship with future collaboration.
