

Linde Engineering Baytown, Texas

Working with Linde Engineering North America, B&W provided engineered Steam Blow Services at the ExxonMobil Ethylene Expansion Project in Baytown, Texas.

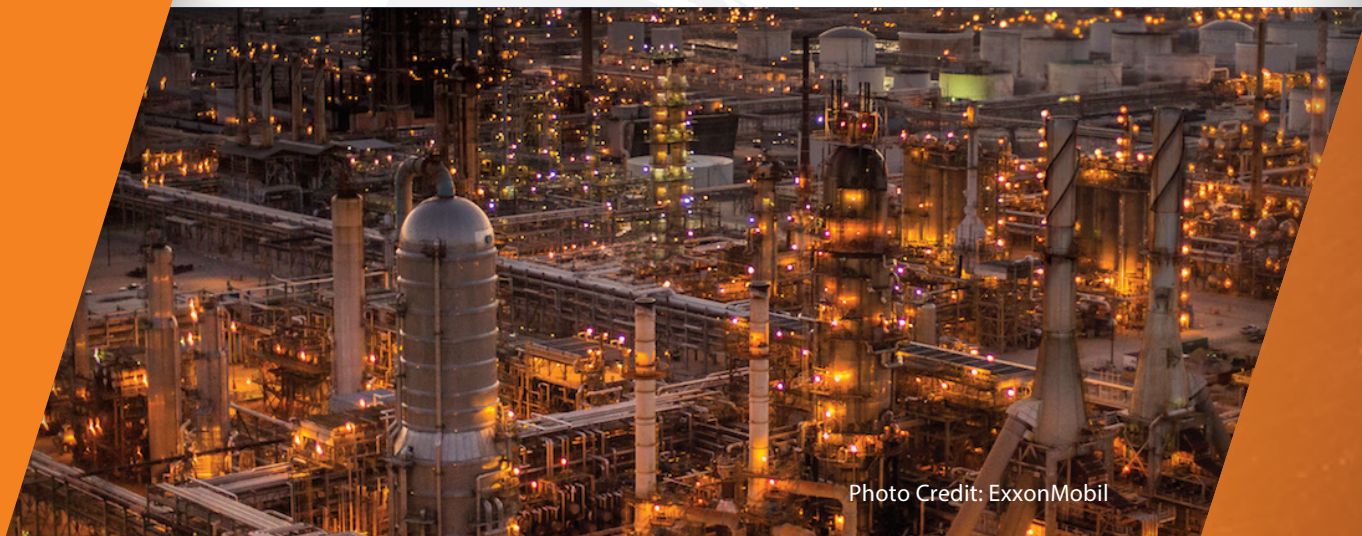

Photo Credit: ExxonMobil

The expansion project in Baytown includes a new steam cracker with a capacity of up to 1.5 million tons per year and provide ethylene feedstock for downstream chemical processing. B&W Energy Services has a great working relationship with Linde Engineering, and looks forward to providing the professional engineering, supervision and equipment required to meet and exceed our clients expectations safely.
