

Port Arthur Ethane Cracker

Port Arthur, Texas

B&W Energy Services is proud to announce the successful completion of a significant project in Port Arthur, Texas, for EPC contractor, McDermott. The massive ethane cracker has the capacity of one million metric tons per year and utilizes six SRT-III® pyrolysis heaters. In 2017, CB&I announced their contract award to build the \$1.3-billion facility by Total Petrochemicals & Refining USA. B&W Energy Services engineered and executed site wide steam blows, AquaLazing, lube oil flushing and chemical cleaning services as the project transitioned from construction into commissioning. B&W also worked directly with the Owner to complete cleaning of interconnecting systems to existing facilities. B&W Energy Services is the world's industry-leading provider of pre-commissioning and pre-commissioning cleaning services.
