

# *Paradise Combined Cycle Drakesboro, Kentucky*

*B&W Energy Services completed quick engineering design, procedures & cleaning approach, in addition to a detailed plan for execution and immediate mobilization for the Paradise Combined Cycle plant in Drakesboro, KY.*

Photo: Tennessee Valley Authority

*Contracted by Kiewit, this project served as a collection of various cleaning services B&W offers—starting with Air Blows, moving to Chemical Cleaning and AquaLazing, then finishing up with Steam Blows. Rapid mobilization began in August with services being performed in various stages during plant commissioning and expected to complete by the end of 2016. B&W continues to provide industry-leading services, through our ability to move quickly on projects with both detail and precision.*
