

NextEra Energy Blythe California

NextEra Energy Resources built a 250-megawatt solar generation plant in Blythe, California - one of the largest in the nation.

Image: Nextera Energy

It consists of more than 600,000 mirrors that are capable of generating enough electricity to power nearly 88,000 homes annually. B&W Energy Services was chosen by NextEra Energy Resources to perform engineered chemical cleaning services, ultra-high AquaLazing pipe cleaning services and engineered steam blow services for this one-of-a-kind project.
