

CP Chem Expansion Old Ocean, Texas

B&W Energy Services was chosen to perform steam blow, oil flushing and air blow services at the CP Chem Expansion in Old Ocean, Texas. The petrochemical expansion includes the addition of two polyethylene units and is expected to increase CP Chem's global ethylene and polyethylene capacity by about 30 percent.

B&W continues its ongoing relationship with Zachry by providing the professionally engineered pre-commissioning services at this plant. B&W has had the pleasure of partnering with Zachry on a number of projects, and continues to be a trusted, reliable and experienced partner on projects across the globe.
