PROJECT SNAPSHOT

Sadara Project

PROJECT SPAN	2015
LOCATION	Jubail Industrial City, Saudi Arabia
SERVICES	Engineering Support, Aqualazing

In 2015, Fluor Mideast Ltd. contracted B&W Energy Services to provide engineering support and AquaLazing services for the Sadara Project in Jubail Industrial City, Saudi Arabia.

The Sadara chemical complex spans 13 square kilometers and was, at the time of the project's execution, the world's largest chemical complex ever built in a single phase. The complex boasts an impressive 26 integrated world-scale manufacturing plants producing more than three million tons of products each year.

B&W began services in the second quarter of 2015, and the rapid mobilization of support and equipment guaranteed a quick start date while keeping the project on schedule.
