PROJECT SNAPSHOT

Pearl GTL Project

PROJECT SPAN	2009 to 2011
LOCATION	Ras Laffan Industrial City, Qatar
SERVICES	Steam Blowing, Lube Oil Flushing, Aqualazing

From 2009 to 2011, B&W Energy Services partnered with Shell to perform pre-commissioning services for the Pearl GTL plant in Ras Laffan Industrial City, Qatar.

Pearl GTL is the world's largest plant to turn natural gas into cleaner-burning fuels and lubricants, and Ras Laffan is Qatar's leading site for liquefied natural gas production and gas-to-liquid.

B&W is honored to have been chosen to provide steam blowing, lube oil flushing and AquaLazing for the \$19 billion GTL plant. Contributing to the Pearl GTL project increased our global reach and still serves as a testament to the scale of B&W's capabilities.
