### PROJECT SNAPSHOT

# Cartagena Refinery Expansion Project

<b>PROJECT DATE</b>	2015
<b>LOCATION</b>	Columbia
<b>SERVICES</b>	Engineering and Site-Wide Steam Blowing

In 2015, B&W Energy Services partnered with REFCAR, a subsidiary of Colombia's state-owned oil company, Ecopetrol, to perform engineering and site-wide steam blow services for their major refinery expansion project.

The project increased processing capacity by 165,000 barrels per day and helped relieve regional refining constraints, enabling REFCAR to produce clean, ultra-low sulfur gasoline and diesel from heavy crude.

B&W is grateful to be selected by REFCAR to deliver engineering and steam blow services for their refinery. This project expanded our international presence and still serves as a testament to B&W's abilities.
