

## SIGNATURE SERIES PROJECT SNAPSHOT

# Jamnagar Expansion Project

<b>PROJECT DATE</b>	2008
<b>LOCATION</b>	India
<b>SERVICES</b>	Engineering, Steam Blowing and Cleanliness Analysis Program Development

In 2008, B&W Energy Services partnered with Reliance to provide engineering services, continuous steam blowing services and develop a cleanliness analysis program for their 1.2MM BBL/day refinery expansion project in Gujarat, India.

The Reliance Jamnagar complex, first completed in 2000, was the largest refinery and petrochemicals complex in the world at the time. The facility's capacity doubled when the second refinery was completed in 2008. To this day, it's the largest industrial project executed by the Indian corporate sector.

B&W is grateful to have partnered with Reliance to deliver world-class engineering and steam blow services for their refinery expansion. This project contributed to B&W's reputation as a global turnkey solutions provider.
